Soft skills

- Communication
- Teamwork
- Adaptability
- Self-direction
- Conflict resolution
- Patience

Skills

- Web Development
- TypeScript
- JavaScript
- React.js, Angular, D3.js
- RxJS, Redux
- HTML5, CSS, LESS
- Webpack
- WCAG, WAI-ARIA
- Jest, Jasmine
- WebDriver, Puppeteer, Playwright

Experience

Software Development Engineer

Akvelon Inc. Bellevue., Russia. Full-time Jan 2024 - Now

Responsibilities:

- Reviewing code for quality and compliance with accessibility requirements.
- Developed solutions for 10 web applications, closely aligning them with user requirements to improve user satisfaction.
- Advised UI designers on technical aspects in 5+ projects to avoid non-compliance with constraints.
- Managed the deployment and release processes for a portfolio of 5+ projects, ensuring smooth project delivery.

Results:

- Remediated 1000+ accessibility issues across website and mobile app, ensuring compliance with WCAG 2.1 guidelines and enhancing UX.
- Built Charticulator into 3+ different BI systems thereby increasing the user audience.
- Tested 300+ visual Power BI objects for security issues, thereby improving quality and increasing user confidence in the product.
- Optimized page loading by 10% thereby speeding up the user experience.
- Developed security and reliability recommendations for 20+ visual Power BI objects to reduce certification timelines three times.

Software Development Engineer

Akvelon-Georgia Tbilisi, Georgia. Full-time Mar 2017 - Dec 2023

Software Development Engineer

Akvelon-Kazan Kazan, Russia. Full-time Feb 2017 - Feb 2022

Lead Developer

BARS GROUP Kazan, Russia. Full-time Jan 2013 - Jan 2017

https://bars.group/

Responsibilities:

- Oversaw the end-to-end development lifecycle for more than 3 projects, ensuring on-time delivery, budget compliance, and quality outcomes.
- Led the entire project as project manager and solution architect with a 6+ person development team.
- Decomposition of a complex task for assignment by developers and planning the implementation sequence.
- Analyzed the technical requirements for the project to assess the complexity and timeframe for implementation.

Results:

- Improved the architecture that increased reused code up to 25%.
- Developed a reusable code architecture for 3 web applications frontend using ExtJS.
- Separated the common code into a module for reuse in 3+ projects.
- Tested the development results of 100+ features and improvements, which had a impact on the overall quality of the product.

Certifications

Power BI Data Analyst Associate (Microsoft), *Oct 2021 - Oct 2024*

Looker Certified LookML Developer (Google), *May 2022 - May 2024*

Education

TU Ilmenau

Master's degree (2015 - 2016)

Research in Computer & Systems Engineering

Kazan National Research Technical University named after A.N.Tupolev - KAI

Master's degree (2014 - 2016)

Computer science & engineering
