Soft skills

- Communication
- Teamwork
- Adaptability
- Self-direction
- Conflict resolution
- Patience

Skills

- TypeScript
- JavaScript
- React.js, Angular, D3.js
- .Net, ASP.Net, C#, Blazor
- Database
- SQL, IBM Informix, SQL Server
- Azure DevOps
- REST API
- Docker, Podman

Experience

Software Development Engineer

Akvelon-Georgia Tbilisi, Georgia. Full-time Feb 2017 - Dec 2023

https://akvelon.com/

Responsibilities:

- Conducted comprehensive code reviews to uphold quality standards and ensure adherence to accessibility requirements, fostering an inclusive application.
- Developed solutions for 10 web applications, closely aligning them with user requirements to improve user satisfaction.
- Advised UI designers on technical aspects in 5+ projects to avoid non-compliance with constraints.
- Managed the deployment and release processes for a portfolio of 5+ projects, ensuring smooth project delivery.

Results:

- Built Charticulator into 3+ different BI systems thereby increasing the user audience.
- Tested 300+ visual Power BI objects for security issues, thereby improving quality and increasing user confidence in the product.
- Optimized page loading by 10% thereby speeding up the user experience.
- Developed security and reliability recommendations for 20+ visual Power BI objects to reduce certification timelines three times.

Lead Developer

BARS GROUP Kazan, Russia. Full-time Jan 2013 - Jan 2017

https://bars.group/

Responsibilities:

- Successfully oversaw the development process as a project manager, ensuring project milestones and goals were met with precision and efficiency.
- Effectively broke down the solution into discrete development tasks, streamlining the project's execution and enhancing team productivity.
- Thoroughly validated development outcomes for accuracy, reliability, and alignment with project objectives, ensuring the delivery of reliable and high-quality solutions.
- Thoroughly assessed and interpreted technical requirements for various projects, facilitating accurate project planning and execution.
- Expertly managed and maintained a network of 60 distributed databases, ensuring data integrity and system stability across a all infrastructure.

Results:

- Improved the architecture that increased reused code up to 25%.
- Created a process for developing and testing new features in a test environment that accelerated the release of new versions.
- Utilized Docker Compose to construct a system that facilitated seamless application migration and database schema updates, leading to a significant enhancement in product quality.
- Enhanced web page performance and scalability by 10% through rigorous optimization techniques.

Certifications

Power BI Data Analyst Associate (Microsoft), *Oct 2021 - Oct 2024*

Looker Certified LookML Developer (Google), *May 2022 - May 2024*

Education

TU Ilmenau

Master's degree (2015 - 2016)

Research in Computer & Systems Engineering

Kazan National Research Technical University named after A.N.Tupolev - KAI

Master's degree (2014 - 2016)

Computer science & engineering
